Eric

By making this arrangement I thought something might jump off the paper but, if so, the jump was short of expectations. The most noteworthy, is the high denoms of a later issue are produced in an earlier issue. True with Oct 78 \$50 & \$100 books produced during the May 78 issue, and, the May 79 notes of \$50 & \$100 produced during Oct 78 sequence. It could be that these books were produced from extra <sup>produced</sup> paper of the sheets & slips of notes, and or, the necessity of large denoms to meet State obligations. Both May & Oct 78 issues were quite late in printing by almost a year. The May 79 issue not much better. It is interesting to note by your inflation table the jump between March & October of 1778 which tripped. Hope to complete the issues of 1780 by year end Sincerely, H.W. Harmer Jr.
